

# RO, RO/L

Roller conveyors/length stops

## Our know-how - your advantage

### Infeed roller conveyors

In 1m, 2m, 3m, 4m, 5m or 6m length and length stops. Length measuring device with scale or electronic digital display available in different lengths (3m, 4m, 5m or 6m) and versions. Attachment to different machine types possible!

### Technical description

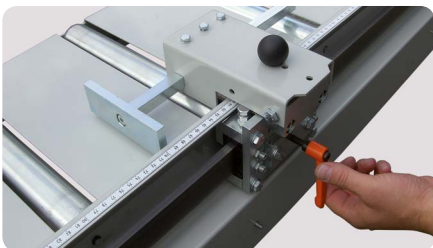

- ball bearing mounted plastic or steel rollers with Ø 50mm
- load capacity per roller about 15 kgs
- roller width 300 mm
- roller spacing about 200 mm
- working height 840 mm - 1050 mm
- with connection piece for relevant machine type
- conversion possibility for mounting on left and right side
- please state machine type when order is placed!

### Versions

RO	Infeed roller conveyor with 2-4 support feet (depending on length) and connection piece.
RO/L	Length stop, basic type.

### Options for RO/L

RO/L/M	Length stop with measuring scale and material stop to be hinged to the back. Stop lockable through tilt clamp lever with support feet and connection piece.
RO/L/HD	Length stop with electronic digital measuring display and material stop to be hinged to the back. Material stop to be set and adjusted on workplace through handwheel; with pneumatic brake.
RO/L/HDP	- Length stop with electronic digital measuring display and material stop to be pneumatically hinged to the back. Material stop to be set and adjusted on workplace through handwheel. With pneumatic brake.

### Quick adjustment

The stop being lockable through clamping lever ensures short adjusting times (at RO/L/M)

### User-friendly

The material stop to be hinged to the back ensures an easy and user-friendly operation (at RO/L/HDP pneumatically hinged)

### Digital length display

Handling and reading of dimensions directly on workplace (at RO/L/HD and RO/L/HDP)

Technical data apply to the basic device without options. Size according to layout.
